

# CHENG LI

University of California, Berkeley / cheng.cli@berkeley.edu / <http://web.gps.caltech.edu/~cli/>

<b>EDUCATION</b>	Ph.D. Planetary Science, <b>California Institute of Technology</b>	2016
	B.S. Atmospheric Physics, <b>Peking University</b>	2011
<b>RESEARCH POSITIONS</b>	<b>University of California, Berkeley</b> 51 Pegasi b Postdoc Fellow	2019 –
	<b>California Institute of Technology</b> Postdoc Scholar, Juno mission team member	2017 – 2019
	<b>Jet Propulsion Laboratory</b> NASA Postdoc Program Fellow	2016 – 2017
<b>AWARDS</b>	51 Pegasi b Fellowship (Heising-Simons Foundation)	2019
	NASA Postdoc Program Fellowship (NPP)	2016
	NASA Earth and Space Science Fellowship	2015
	Student of Academic Excellence, Peking University	2010
	The Piang'an Insurance Inspirational Scholarship	2009
	The Junyuan Tang Undergraduate Scholarship	2008 – 2011
	The First Prize of the 23 <sup>rd</sup> National Olympiad in physics, Shanghai, China	2006

<b>RESEARCH EXPERIENCE</b>	[1] Photochemical modeling of Titan's atmosphere, discovering a stable layer near 500 km above surface [2] Modeling moist convection in hydrogen atmospheres, explaining the periodicity of Saturn's Giant storms. [3] Mapping the global distribution of ammonia gas in Jupiter's atmosphere using the observations from the Juno microwave radiometer. [4] Theoretical calculation on the moist thermodynamics of an atmospheric laden with multiple condensing species [5] Development of a new three-dimensional Cloud Resolving Model (CRM) for planetary atmospheres.	
<b>STUDENT ADVISING</b>	[1] Harriet Brettle, Ph.D. student at Caltech (on Jupiter's polar vortex) [2] Oriel Humes, undergraduate student at Caltech (on QG dynamics) [3] Jackson Briones, undergraduate student (on Juno MWR data processing)	

- [4] Tianhao Le, Ph.D. student at Caltech (on cloud radiative transfer)
- [5] Ziwei Li, Ph.D. student at MIT (on quasi-geostrophic dynamics)
- [6] Huazhi Ge, Ph.D. student at UCSC (on cloud-resolving models)
- [7] Alexandra Klipfel, undergraduate student at Caltech (on Jupiter's polar vortex)

<b>TEACHING</b>	Lecturer on numerical models for Ge 194 (Juno and Cassini)	2017 / 10
	Lecturer on applied statistics for Ge 194 (Juno and Cassini)	2017 / 10
	Lecturer on Python Workshop for Caltech Graduate Student Council	2015 / 01
	Teaching assistant for GE 150 (Planetary Atmosphere)	2014 / 12
	Lecturer on Atmospheric Radiation for ESE 101 (Earth's Atmosphere)	2013 / 10
	Teaching assistant for ESE 101 (Earth's Atmosphere)	2013 / 09
	Teaching assistant for Ge 1 (Earth and Environment)	2013 / 05
	Lecturer on Linux for Caltech Planetary Science Division Resource Seminars	2012 / 09
